

TOP REASONS CONTRACTORS USE **FIFTHLIGHT**

- 1 MINIMAL WIRING**
Run DALI communication wires and power wires in the same conduit
- 2 ON SITE SUPPORT**
We are on site throughout the project to test, commission and troubleshoot the system, ensuring that the job is done properly, on time and on budget
- 3 EASE OF INSTALLATION**
Connect all sensors and low voltage switches to the DALI bus or to a powered terminal. Diagnose sensors remotely via software.
- 4 SOFTWARE FLEXIBILITY**
Cut costs when handling change orders by re-configuring groupings through software
- 5 COMMON INTERFACE**
All dimmable ballasts, field relays and relay panels use the same DALI communication interface (2 plenum rated wires, 18 AWG non-twisted, non-shielded, non-polarized)
