

TOP REASONS ENGINEERS SPECIFY **FIFTHLIGHT**

- 1 SIMULTANEOUS MULTI USER WEB ACCESS**
Provide regulated access to hundreds of users via a web browser, VOIP telephone or mobile device
- 2 MULTI BUILDING CONTROL**
Consolidate information and control for a portfolio of buildings to a single point of access.
- 3 SUPERIOR BALLASTS**
Maintain power factor above 0.95 and total harmonic distortion below 10% throughout the dimming range. Cycle lamps 200K times without aging them prematurely
- 4 ADVANCED LIGHTING STRATEGIES**
Innovative approaches to lighting management conserve energy, simplify maintenance and raise employee productivity
- 5 COMMON OPEN PROTOCOL INTERFACE**
All dimmable ballasts, field relays and relay panels use the same DALI communication interface (2 plenum rated wires, 18 AWG non-twisted, non-shielded, non-polarized)
